# MAGIC WORDS THRU THE ZODIAC

MY TRIBUTE TO W.D. GANN

VOLUME 1

A GUIDE TO THE WORK

By

ROBERT RUNDLE

COSMOLOGICAL ECONOMICS

## PUBLISHER'S PREFACE

Anyone who has studied the work of W. D. Gann for an extended time, particularly on the deeper levels and through the inside teachings, will have become aware that there are a number of quite different approaches to the study of Gann Theory. The most exoteric approach looks at his more obvious technical analysis books and tools, such as his 1/8<sup>th</sup> divisions, Gann Angles, swing trading systems, and the like, and perhaps delves a bit into some basic cycle theories.

As the student advances, he begins to explore more advanced scientific and esoteric concepts, like astronomical theory and its potential influence upon human trends and events, crossing over into esoteric theories of astrological and numerological prognostication of future events, or what is more commonly called forecasting. As one pushes into these more esoteric theories, only then does one begin to discover the greater genius that was Gann.

For it is not until one begins to penetrate the veils of Gann's pedagogical style, that one is able to enter into the deepest thinking and theories of this most mysterious of market traders and esoteric scientists. Gann, coming from the Ancient Traditionalist school of esoteric thought, was one who believed in the preservation of the secrecy of the Great Mysteries of Nature.

Gann was initiated into the secret traditions of esoteric science that possess an insight which penetrates far deeper than the impotent scientism and pseudointellectualism of the materialistic Quacademia (a wonderful and appropriate term coined by radical Egyptologist, John Anthony West) of today.

Gann respected and protected this Sacred Tradition, and refused to ever openly reveal, or clearly lay out his deepest ideas, let alone the entire framework of his Theory the way a modern scientific thinker or scholar would do. Instead he communicated his knowledge primarily in two primary ways.

The first was through applied technique, punctuated by brief, summarized teachings, cryptic texts, and complex rules to follow. Those who know Gann's most serious works, his private courses, know that few of them ran longer than 40 pages, and

most ran from 3 to 10 pages. These small courses were then combined into different sets to produce what are now called his "Master Courses", though there were many versions of these compilations that Gann produced. Each of these courses generally presented one specific technique or set of conjoined tools, or it would address a particular market, providing a suite of tools and analyses to use on that market.

Gann also wrote a series of excellent financial market books mostly focused on technical analysis and trading rules and strategy. These present his more exoteric ideas, but also subtly weave in some of the deeper themes and principles as well, always leaving a breadcrumb trail of clues for the obsessive seeker. But these technical tools and applications have always provided a road for the engineer, trader or scientific type to work with logical mathematical systems and tools, which could be reverse engineered from Gann's charts or cryptic explanations in an attempt to recreate Gann's technology.

The Baumring School is a good example of the approach through the reverse engineering of the scientific system of the Law of Vibration. It studies the foundational sciences of Gann's day, then interprets Gann's tools, forecasts, charts, models and writings as hints towards a larger mathematical, geometrical, astronomical system, the entire mechanics of which is attempted to be worked out, from cause to effect.

The second approach is almost diametrically opposed to the first. In this school, it is clearly understood that Gann intentionally and methodically veiled and encoded his greatest secrets into some of his specific Key works, using a symbolic system of references, or actual cryptology itself.

To do so, Gann used astronomical, astrological, cryptological, numerological, Kabalistic and Masonic techniques and codes to veil and hide his secrets in his two strangest books, *The Tunnel Thru the Air*, a seemingly sappy romance novel, based upon a 1920's sci-fi world war theme, and *The Magic Word*, an otherwise uninteresting collection of Bible quotes on health, life and the like, illustrated with a handful of symbolic illustrations.

It has become understood after a century of people exploring Gann's work that these codes DO exist in his texts, and with the advent of the Internet, there developed a

new interest in decoding these works within some online collaborations. A few serious groups developed over the years, taking the study to a higher level than had generally been accomplished before this time.

People may remember or have heard of early groups in the late '90s, like the Tunnel Lodge, which the respected Gann researcher, Allan Blakstad, was a core member of, or others like the one Petter Amundsen developed, before continuing on to decode other types of works. The author, Robert Rundle was one of the early comers to this work, so has had the good fortune to do Tunnel research with some of the best minds and experts in the field.

Main stream thinkers and scholars would be shocked to learn that one of the greatest thinkers in a related field, let's call it Economics or Finance, would work incredibly hard to make his work as impenetrable to the common thinker and reader as possible. Quacademia, itself, has no actual category or field of study for "forecasting and trading the financial markets".

The reason for this is that Quacademia and the scientific and economic communities in general consider all market movements to be random and unpredictable. So how can they have a class or program on what they acknowledge they have total ignorance of? Obviously, they cannot, which explains why there are NO courses on market trading or forecasting in ANY university in the world.

This helps to explain why Gann, probably the greatest expert in this field the world has known, refused to share his ideas and insights with anyone that did not "prove themselves worthy" to obtain them. Such proving required a combination of extraordinary efforts at study to an unusual level of scholarship within abstract fields that most people have never heard of, let alone mastered.

These fields range from chemistry, to astronomy, Biblical knowledge, to familiarity with the mathematics, geometry and sciences of Ancient Civilizations from Babylon, to Egypt, to India, Israel and more... It requires the mastery of secret systems of coding and symbolic representation, like Kabbalah, astrology, Alchemy, and numerology.

This wisdom rests upon obscure principles and systems arising out of the Pythagorean Quadrivium, tracing its roots back to the Ancient Egyptian Temple,

where Pythagoras studied for 22 years, and to ancient India, where Gann's obscure calculators, like the Square of Nine, originate.

And not only does it require a mastery of these esoteric subjects, but it further requires a particular type of mind that has an obsession for details, almost like an OCD for intellectual clues, trails, threads and leads of ANY kind in ANY place, combined with a knack for solving complex, multi-dimensional puzzles.

It requires a massive effort to learn to be able just to find and recognizing the clues, let alone to read and interpret them. But when this interpretation is done, it reveals a secondary line of content, or perhaps more of a system knowledge, that is woven as a sub-template to the overriding text.

This decoding process leads to a specific kind of information relating to cyclical phenomena, including special cycle lengths, start and end dates, phasing, and so much more. Through symbolic decoding, these seekers weave together tapestry of numeric/astro/market meaning from 1000's of hidden threads, in the hope of leading to a grand revelation of Gann's greatest secrets! It is the ultimate scavenger hunt, digging for tiny clues within massive realms of knowledge, numerous traditions, multiple languages, and a plethora of scientific and metaphysical systems.

It is the kind of work that would drive 95% of people stark-raving mad after a few weeks of work. As such, this hidden secret of Gann's has remained hidden to all but a very few honest, hard-working seekers with the perseverance to keep at the task without quitting, and the perspicuity to see thru the veil to what was carefully hidden.

Our author, Robert Rundle, is one of those few, rare and unusual people who possesses both these requirements, the perseverance to keep at this job for 20 years, and perspicuity to find answers and break codes where others see only a silly story and a bunch of random Bible quotes.

*This knowledge is truly "for those with eyes to see..." as they say... and you now have the opportunity to have the veil lifted for yourself, so that you too can see...*

**William Bradstreet Stewart**

**1 June 2018, Santa Barbara, CA**

## FOREWORD

I am relieved that I can now relinquish a secret from my Akashic Records that has burdened me for some time. It has been known by academics that *The Holy Bible's Torah* or *Pentateuch* contains a valuable secret that has been sought after for over 2400 years. Many spend a lifetime searching, but very few will find anything. Here is my interpretation of unlocking these secrets, derived from many years of working under the auspices of William D. Gann, and his works *The Tunnel Thru the Air* and *Magic Word*.

You don't need to take the stairs; here is an elevator to understanding one well-hidden level of Gann's writings. As in Proverbs 25:2, "*It is the Glory of God to conceal a thing: but it is the honour of Kings to search out a matter.*" The cornerstone of Science rests upon the relationship between numbers, the letters of the Hebrew and English alphabets, and their vibration thru the Zodiac and Annual Calendar.

### A Word of Warning

Understanding this sacred knowledge will damage your ignorance and may cause discomfort to closely-held presuppositions. Relinquish the Ego and see thru the eyes of a child. To openly reveal this to just anyone will devalue your level of knowledge. Keep it tight and hide it from the fools. Please be responsible in the sharing and dissemination of this information with respect to the copyright thereof, and the conditions of the Confidentiality Agreement we have entered into together.

I have sat on the secrets Gann has shown me for many years, fearful of sharing such valuable information for many reasons, and I believe that Gann would never have trusted me with this knowledge if he didn't want me to pass on his legacy when the time was right. You only have to read *The Tunnel Thru The Air* and *The Magic Word* to see that Gann really wanted to keep this knowledge alive but respected. He knows I cannot keep a secret, and my custodial sentence is over.

'Gann's Key Secret' to unlocking his veiled references, is a Holy Bible/Freemasonic style cypher he uses on Key Words {Magic Words} thru out his writings. Just as 'The Word Became Flesh' in John I, "***In the beginning was the Word, and the Word was with God, and the Word was God. <sup>2</sup> He was with God in the beginning.***" Even as early as the OROLO advertisements, his 1909 *Ticker Interview*, and possibly in a 1908 work, masquerading under the pen name Luo Clements.

A major concern of mine was that I did not want to discredit ***The Holy Bible*** and its Christian religious beliefs with a never publicly seen before layer which will create more questions than answers, fueling the usual debates, and not wanting to end up in the next Salman Rushdie ***Satanic Verses*** style of controversy and get a Fatwa issued against me.

I sincerely believe this following information only supports and reinforces the knowledge and wisdom of ***The Holy Bible's*** many authors thru the 7 layers of Myth, only achievable via GOD's ever watchful divine guidance {Helena Blavatsky said myths have 7 hidden esoteric layers within the allegory of the face value story}. It really is Magic, and like Gann says, "***You would not believe it anyway.***"

I anticipate this work is going to piss off the few people who guise their area of expertise within the qualities of this phenomenon, using it as a tool to openly display their level of knowledge to their peers. Not just the very few traders who know it, but a limited number of knowledgeable Freemasons {and other such members of Secret Societies}, Religious Leaders, World Leaders, Alchemists, Authors, Artists, Song Writers, Movie/Film Writers and Producers.

Only a few know, but they really stand out, well above the ones who are just 'Talking the Talk' and coincidentally happening to hit on a series of Key "structured" Words and phrases. The others are just carriers of the story at its face value. This is only but one layer of their Art, which is rarely only just to 'Hide in Plain Sight' this phenomenon.

Imagine how hard some have suffered to be taught this knowledge. As you will see, my tribute to W. D. Gann herein is payback for anyone who has publicly ridiculed his good name, by vindicating him forever. My sincere regret is this information may fall into the hands some of the Gann parasites.

Please do not analyze my words and page numbers as if it were a Gann Novel. I am just going to say it as best I see it, nothing veiled. But I will leave some comments unfinished, so you at least have to do some of the work yourself.

I'll try to keep it simple, but some prior understanding of all things esoteric, Biblical, Gann's writings, especially *The Tunnel Thru The Air* and *The Magic Word*, cycles, trading and astrological knowledge is always an advantage. Any omissions are purposeful and are to be covered in later volumes.

Any fool who disagrees with my theory simply has not done the work to prove this phenomenon for themselves. It is that simple. Do the work for yourself and you will agree the evidence is overwhelming.

If you do not agree that the following methods can be attributed to William Gann, please donate everything you read here to me Robert Rundle, as I am more than happy to take credit for any or all of these methods, i.e. "call it Robert Rundle's Jesus 3 days, Jesus Seven Days, Jesus Ascends, SEVEN Days, 4 Seasons, and Robert Rundle's Tunnel Thru The Air."

Please excuse any typing or calculation errors as this is a huge volume of work collated from my notes over many years, and mistakes are bound to happen. I am not an expert on the Hebrew alphabet and language.

Everyone has read comments like "Gann said This" and "Gann said That", often with some random non-correlating *Holy Bible* or Gann quote attributed to it. Having you question but, Where, Why, How? No.... that's got to be BS? Well now you can forget all the unsubstantiated crap quoted by Gann gurus and analyze his Words for yourself.

To quote Gann from his Foreword to *The Tunnel Thru The Air*, you...

*"... will understand why Jesus rose on the third day and rested on the seventh day. Robert Gordon's seven days will no longer be a mystery because you will have gained understanding. I believe this book will prove interesting and valuable to men and women in all walks of life. If it does, you will be thankful to the power that guided my hand in showing you the way to eternal Truth. My object will have been accomplished and I will have my reward."*

Additionally, there are 3 main levels to *The Tunnel Thru The Air* that provide cycle inputs:

1. 'Face Value Facts', Gann does give some simple cycle 'Gifts' thru out TTTTA which will become apparent just via careful study and recording the events as presented at their face value.
2. 'Esoteric Events'
3. 'Magic Words Thru the Zodiac'

Often all 3 areas of information inputs are interlinked supporting each other, giving confluence and conformation that you are on the right track. Esoteric Events will be covered in a series of follow-up collaborations with a colleague, later. There is enough material to fill hundreds of such books.

For Gann to structure *The Tunnel Thru The Air* {TTTTA} with so many fine cycle events over so many different levels, thru different themes, proves that he must have known the underlying cause by which the cycles {or Law of Vibration} are structured. Some would call this his "Master Time Factor", but I am not convinced that this is the terminology he would have applied here. I will add my interpretations of the MTF formula in a later chapter.

There are some overlapping repetitions of Biblical, Freemasonic, and Alchemical dates and event pairing that Gann may have reverse engineered and rebadged with his own story line, but most are predominantly his own works of genius. Gann's great works continue to be an ongoing source of information, ideas and encouragement thru the development of this book. Gann was truly amazing man that I trust the reader will come to understand more upon reading this book. And do not forget to say a Thank You to him in appreciation for what he is about to give you.

I would also like to thank the late Rupert Sheargold for believing in me and my study path at a time in my life when his encouragement was important.

If you can't read the book you want, then write it for yourself...
